

Dear consumer,

The salfordinsole™ is designed for use by health care professionals registered with the UK Health Professions Council, or equivalent governing body in your country. It is not suitable for use without first seeking the advice of a Podiatrist, Physiotherapist or other health professional who is trained in the use of foot orthoses. Incorrect use of foot orthoses or insoles can cause foot or lower limbs problems.

Please locate your nearest Podiatrist using the Society of Chiropodists and Podiatrists web site:

<http://www.feetforlife.org/cgi-site/chiroprpodist.cgi>

Then, print this page and take it with you when you visit the Podiatrist. They will be able to assess your feet and use the salfordinsole™ appropriately.
